

SPECS:

The TraumaMan Surgical Abdomen Catastrophic Event Team Training Package allows you to transform your existing TraumaMan System's abdominal area into a flexible abdominal surgical site. The Catastrophic Event Team Training Package combines the Surgical Abdomen Platform and the Catastrophic Event Team Training Module.

The Catastrophic Event Team Training module includes 3 procedures:

- Nicked Aorta procedure
- Nicked Renal Artery procedure
- Lacerated Kidney procedure

Team training might include the diagnosis and treatment of a renal or aortic injury, the management of an emergency surgery, preparation for a catastrophic surgical event, and building confidence and reliability in an individual role within a team framework.

Module Components:

- Abdominal Cavity with Vertebral Column
- Internal Organs including Kidneys and Intestines
- Aortic Bifurcation Insert
- Nicked Renal Artery
- Lacerated Kidney
- Simulated Insufflation Frame
- Blood Circulation System with Bladder Cavity Insert
- Red Concentrate
